

## 1. Project summary: The Land Reform for Agricultural Productivity (LRAP) project

The Land Reform for Agricultural Productivity (LRAP) project, funded by the Millennium Challenge Corporation (MCC), is led by the Millennium Challenge Account Togo Implementing Agency (OMCA-Togo) to support the Togolese government in the pursuit of its land reform process and the operationalisation of the land and property code (Law n°2018-005 of 14 June 2018). The LRAP project will ultimately improve the security of land tenure with a view to increasing investment in the agricultural sector. The Consortium started its activities on 1 August 2022. It is implemented over a base period of 12 months and an optional period of 31 months.

Within the framework of the implementation of this project, the Consortium VNG International, Cadasta Foundation, Kadaster International and WiLDAF-Togo provides technical assistance to OMCA-Togo, to implement the project activities. The Technical Assistance Team (TAT) to the project is to support: the design and testing of land tenure methodologies; the identification of the least complicated and inexpensive approaches to land tenure security in rural areas; and the improvement of administrative regulations, procedures and practices.

## 2. Technical Assistance Team: Key experts

### **Egy K. Soussou (VNG International)**

*Country Representative /*

*Associate expert / Chief of mission*

### **René-Claude Niyonkuru (VNG International)**

*Specialist in land dispute resolution*

### **Aurelle Djogbenou (Cadasta)**

*Specialist in geo-referencing  
and mapping*
